Sale of Tahmoor Coal Mine

McGrathNicol, Liquidators of Tahmoor Coal Pty Ltd (in Liquidation) announced on Thursday 18 June 2026, they have entered into an agreement to sell the assets of Tahmoor Coal to a consortium comprising of Golden Energy and Resources Pte Ltd (GEAR) and M Resources Pty Ltd (M Resources).

Completion of the transaction is subject to customary conditions precedent, including State and Federal Government approvals. Upon satisfaction of these approvals, sale completion is expected around late September/early October.

GEAR M Consortium will work with the Liquidators and current Tahmoor Coal management team prior to sale completion to finalise plans to restart mine operations as quickly as possible after completion, subject to required approvals and operational readiness.

The Liquidators understand that the incoming owner intends to re-engage with former employees and prioritise the rehiring of suitability qualified members of the Tahmoor Coal workforce as an important part of the restart plan. This is expected to stimulate employment opportunities and activity at the mine and surrounding communities.

GEAR M Consortium has a strong track record of operating in the region through its involvement in Illawarra Met Coal complex operated by GM3, which owns the nearby Appin and Dendrobium mining operations.

If you have any questions, please feel free to email tahmoorenquiries@tahmoorcolliery.com.au for assistance.

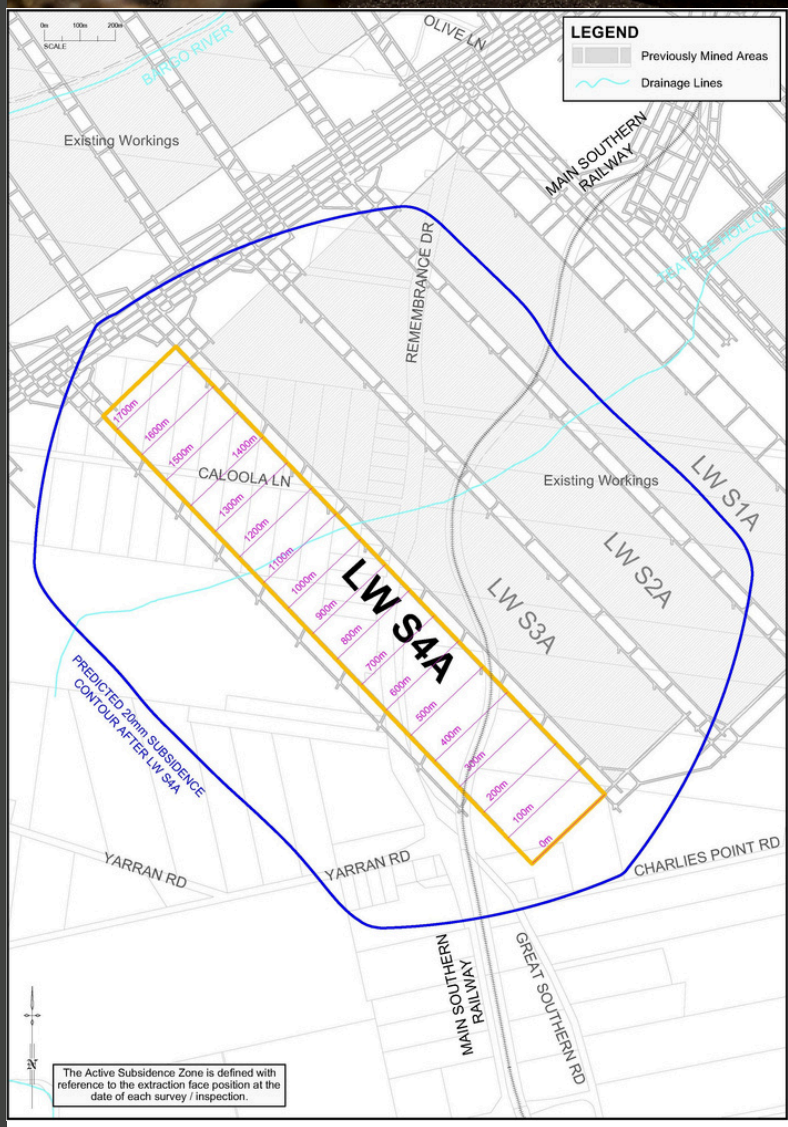

Figure 1 highlights the location of Longwall S4A in yellow.

- The blue line (predicted 20mm Subsidence Area) indicates the area predicted to experience subsidence from LW S4A mining.
- The grey shading depicts the previously mined areas.

Further updates about the restart of mine operations will be provided later in the year once known.
