GM³ commences as Tahmoor Mine Operator, sets course for December restart

Golden Energy and Resources (GEAR) and M Resources, completed the acquisition of Tahmoor Mine on Wednesday 7 October 2026.

With the acquisition now complete, GM³ has commenced as the new operator of Tahmoor Mine, progressing work towards restarting longwall operations in December, following an extended period of suspended operations.

GM³ is ramping up work at Tahmoor to ensure the mine is ready for a safe and efficient return to longwall production. The transition brings greater certainty for Tahmoor Mine's workforce and the Wollondilly community.

Recruitment and onboarding of operational employees will continue in stages over the coming months, with the workforce expected to grow to more than 580 employees.

GM³'s goal is to build a sustainable operation that provides stable employment and continues to deliver economic benefits for the region and community for many years to come.

Tahmoor joins GM³'s existing steelmaking coal portfolio alongside Appin Mine and Dendrobium Mine, strengthening the company's presence across Wollondilly and Illawarra regions.

Come say hi at the Wollondilly Arts Alive Festival!

GM³ is proud to be the premier event partner of the 2026 Wollondilly Arts Alive Festival in Picton this Saturday 10 October.

Make sure you stop by the **GM³ Zone** to meet our teams from Tahmoor Mine and Appin Mine, pick up some free merch, and enjoy a range of family-friendly activities, including a kids' colouring competition, photo booth and virtual reality experience.
